IN THE CLAIMS:

Claims 1-29 (cancelled).

Claim 30 (new): A process for making a paper, the process comprising the steps of:

providing a sheet having a first side and a second side wherein the second side is opposite the first side wherein the sheet is substantially flat and forms a plane;

connecting an antimicrobial layer to the first side of the sheet wherein the antimicrobial layer is made of polyethylene having silver zeolite;

connecting a water resistant layer to the first side of the sheet; and

scoring the water resistant layer wherein the water resistant layer is located between the antimicrobial layer and the sheet.

Claim 31 (new): A process for making a paper, the process comprising the steps of:

providing a sheet having a first side and a second side wherein the second side is opposite the first side wherein the sheet is substantially flat and forms a plane;

connecting an antimicrobial layer to the first side of the sheet wherein the antimicrobial layer is made of polyethylene having silver zeolite;

connecting a water resistant layer to the first side

of the sheet;

scoring the water resistant layer; and  
connecting a paper layer to the water resistant layer wherein  
the paper layer is located between the antimicrobial layer and the  
sheet.

Claim 32 (new): A process for making a paper, the process  
comprising the steps of:

providing a sheet having a first side and a second side  
wherein the second side is opposite the first side wherein the  
sheet is substantially flat and forms a plane;

connecting an antimicrobial layer to the first side of the  
sheet wherein the antimicrobial layer is made of polyethylene  
having silver zeolite; and

connecting a plurality of water resistant layers to the first  
side of the sheet wherein the plurality of water resistant layers  
is located between the antimicrobial layer and the sheet.

Claim 33 (new): A process for making a paper, the process  
comprising the steps of:

providing a sheet having a first side and a second side  
wherein the second side is opposite the first side wherein the  
sheet is substantially flat and forms a plane;

connecting an antimicrobial layer to the first side of the  
sheet wherein the antimicrobial layer is made of polyethylene  
having silver zeolite; and

adhering a paper layer to the first side of the sheet wherein the paper layer is located between the antimicrobial layer and the sheet.

Claim 34 (new): A process for making a paper, the process comprising the steps of:

providing a sheet having a first side and a second side wherein the second side is opposite the first side wherein the sheet is substantially flat and forms a plane;

connecting an antimicrobial layer to the first side of the sheet wherein the antimicrobial layer is made of polyethylene having silver zeolite;

adhering a plurality of water resistant layers to the first side of the sheet; and

adhering a paper layer to the sheet wherein the plurality of water resistant layers are located between the antimicrobial layer and the sheet.
